Although I didn't code this site, it is based upon a Brochure which I conceived, wrote and designed. This site (especially the broken CSS on the first page!) is sorely in need of a makeover, which I will begin in April. I worked as the Commercial Leasing Manager for the DL Saunders Companies in Boston for 10 years and continue to work here in NC as their primary ad and brochure designer.

When I enrolled my children at Cameron Park Elementary School, I was amazed to see their website was completely un-navigable. Using their existing structure, and working closely with the technology teacher and principal, I redesigned the site. Site is currently maintained by school staff and I make frequent updates to more content.

Based upon a brochure created by Hyers Design, the Chapel Hill neighborhood of Kings Mill / Morgan Creek, childhood home of James Taylor, is established and beautiful, and I hope the website reflects this.

In designing Moses Carey's campaign website for his run for NC State Senate, the web team needed an eye-catching design to complement their database skills. Hyers Design created the layout and graphics to set Mr. Carey's site apart.
